Subject : ESSAR Steel Algoma Inc. Recycle Content and LEED

Sustainability, with respect to the Canadian Green Building Council's Leadership in Energy and Environmental Design (LEED ®) principle for construction products, is supported by the ESSAR Steel Algoma Inc. manufacturing process and is consistent with our corporate environmental policy.

ESSAR Steel Algoma Inc. is an integrated steel producer based in Sault Ste. Marie, Ontario, Canada. Revenues are derived primarily from the manufacture and sale of hot and cold rolled steel products, including hot and cold rolled sheet and plate.

ESSAR Steel Algoma Inc. products are currently made using the Basic Oxygen Furnace (BOF) process. The average recycle content of our steel ranges from 20% to 25% annually. Of this, post-consumer scrap content averages 5% to 8%, while 92% to 95% represents post-industrial content.

We trust this information satisfies any questions you may have regarding the status of the ESSAR Steel Algoma Inc. product mix with respect to the LEED ® protocol but we would be pleased to answer any additional questions that might arise.

Sincerely,
ESSAR Steel Algoma Inc.
